## Rolls R103 Single Rack Space Security Cover

Single Space Security Cover

---

## Rolls RA200 Power Amp

Stereo 100 Watts Per Channel Power Amp

---

## Rolls RA62c Headphone Amp

The ROLLS RA62c is a six-channel headphone/earphone amplifier for professional audio monitoring. A variety of input options are available including 1/4", RCA, and balanced XLR. Since the MONO/STEREO switch is after the pan control, it will mix 2 MONO signals and their balance can be adjusted with the Pan control. With the addition of rear panel Direct Input connectors, each channel may mix a second stereo signal.

# Rolls RPQ160 Parametric Equalizer

Rolls RPQ160 Parametric EQ.

The RPQ160 is a four-band parametric equalizer for the professional audio installation and music market. The unit is housed in a steel painted 1U rack space chassis, has an internal power supply, and is designed to withstand the rigors of road use.

Each frequency band has a variable Frequency select control which adjusts the frequency center, a Width (Q) control which varies the shape of the equalization curve, and a +/- 15 dB Level control. Additional frequency control has been provided with variable High and Low pass shelving filters. An overall Level control, a Bypass switch, and a Power LED round out the front panel.

Since equalization is used on virtually every type of audio signal and in many various applications, the RPQ160 has RCA, 1/4" and XLR inputs and outputs provided on the rear panel.
