

# DigiTech XTD Tone Driver Overdrive Pedal

## DigiTech XTD Tone Driver Overdrive

The Tone Driver™ is for guitarists who live for overdrive crunch.

This distortion stompbox features a huge range of different distortion types that can be morphed into different combinations as you rotate our exclusive Distortion Morph knob. This gives you a near unlimited supply of combinations. Now, you are no longer stuck with only one distortion type in a pedal. But that's not all. There are two outputs, one for normal signal out, and one that features advanced cabinet modeling for live and recording direct-to-board applications. And instead of the standard stompbox tone controls, DigiTech has even incorporated their innovative spectral-contouring EQ, which delivers a far greater tone range than other distortion stompboxes.
